University Library

Outline

- What is Enlighten? Where did DAEDALUS go?
- Background to repositories and open access
- Why should I deposit in Enlighten?
- Finding material in Enlighten
- Repositories, publishers and copyright
- Research funders and open access
- Enlighten demo and download statistics
- How to deposit in Enlighten
- Questions?

What is Enlighten? Where did DAEDALUS go?

- DAEDALUS project funded 2002-2005 to establish an institutional repository for GU
- Established two repositories: Glasgow ePrints Service (published material) and Glasgow DSpace service (other material)
- Enlighten is the overall name for both repositories: University's institutional repository service
- Enlighten is a fully supported service

Background to repositories

- Repositories are online databases offering free access to the full text of publications
- Repositories offer access to publications to anyone with an Internet connection
- Repositories are not a substitute for publishing via normal publication mechanisms
- Repositories are one way of achieving the goal of Open Access
- Both Institutional and Subject repositories exist

Open Access

- Making scholarly material freely available online
- Can be achieved either via in an open access repository (such as Enlighten) or by publishing in an open access journal)
- Open access journals do not charge for access via a subscription model. Revenue is generated by page charges (which can be covered by grants). Peer review remains the same
- Some publishers experimenting with open access options, e.g. Springer Open Choice

Why open access?

- Increasing access to scholarly literature
- Absurdity of current situation
- Public funds – public access
- Widen access in developing countries

Wellcome Trust Position Statement on Open Access

The mission of the Wellcome Trust is to foster and promote research with the aim of improving human and animal health. The main output of this research is new ideas and knowledge, which the Trust expects its researchers to publish in quality, peer-reviewed journals.

The Wellcome Trust has a fundamental interest in ensuring that the availability and accessibility of this material is not adversely affected by the copyright, marketing and distribution strategies used by publishers (whether commercial, not-for-profit or academic). With recent advances in internet publishing, the Wellcome Trust seeks to encourage initiatives that broaden the range of opportunities for quality research to be widely disseminated and freely accessed.

The Wellcome Trust therefore supports unrestricted access to the published output of research as a fundamental part of its charitable mission and a public benefit to be encouraged wherever possible.

Why should I deposit in Enlighten?

- Increased access to publications leads to higher visibility and thus increased impact
- Possible requirement to satisfy requirements from funders
- Research groups can make their publications available so they can be identified
- Strong encouragement from University to do so

Finding material in Enlighten

- Local repository search
- However, more importantly:
 - Google and Google Scholar
 - Yahoo and other search engines
 - Scirus search engine
 - Databases such as Scopus
 - Harvesters such as OAIster
(<http://www.oaister.org>)

Expression of CXCR4 on feline peripheral blood mononuclear cells: effect of feline immunodeficiency virus infection.

Willett, B.J. and Cannon, C.A. and Hosie, M.J. (2003) Expression of CXCR4 on feline peripheral blood mononuclear cells: effect of feline immunodeficiency virus infection. *Journal of Virology* 77(1):pp. 709-712.

Full text available as:

PDF - Requires [Adobe Acrobat Reader](#) or other PDF viewer.

Abstract

CXCR4 expression on feline peripheral blood mononuclear cells (PBMC) was analyzed. While monocytes and B lymphocytes expressed CXCR4, no CXCR4 was detected on T lymphocytes, in stark contrast to the expression pattern on T lymphocytes from humans. In spite of the important role that CXCR4 plays in infection with feline immunodeficiency virus, expression on PBMC in vivo was unaffected by infection with either a primary or a cell culture-adapted virus strain.

Type:	Journal article (on-line or printed)
Status:	Published
Refereed:	Yes
Subjects:	S Agriculture > SF Animal culture
Unique ID:	glaseprints:2003-2338
Faculty and Department:	Veterinary Medicine > Veterinary Medicine
Publisher:	American Society for Microbiology

Repositories, publishers and copyright

- Assigning copyright to a publisher does not generally mean that you cannot deposit in a repository
- Most publishers now permit authors to deposit a copy of their articles in repositories
- This is a right granted to authors over and above any copyright agreement you have signed
- However, most publishers will only allow you to deposit your 'author final version' of your work
- Some publishers have embargo periods, e.g. an article can only be deposited in a repository 6 months after publication

Author final versions

- The version of your paper following refereeing and editing
- NOT the pre-print version
- Must not include publisher logos, formatting etc.
- Recognise people may not have suitable versions of older material
- However, good idea to start keeping a suitable version and depositing it at the time of publication

Checking Publisher Policies

- Repository staff will check this for all publications submitted to the repository before they are made publicly available
- Database of publisher policies available at <http://www.sherpa.ac.uk/romeo.php>
- If unsure you can check with your publisher, or repository staff can do this for you

Funders and open access

- Major funders now starting to require publications arising from grants are made freely available
- Wellcome Trust, MRC, BBSRC
- Policies vary from funder to funder
- Wellcome Trust and MRC require/will require deposit in PubMed Central database
- BBSRC will require deposit in 'any suitable repository' (Enlighten)
- Library repository staff can do deposit on your behalf

Overview of Enlighten

Download statistics

- >250,000 pdf downloads since repository was launched
- >20,000 overall downloads of full text article per month
- Top item downloaded 9,900 times
- Top ten items all downloaded over 1,400 times

How to deposit in Enlighten

- Self-deposit published material: register at <http://eprints.gla.ac.uk>
- One person can deposit on behalf of several authors if required
- Mediated deposit: send your papers to deposit@lib.gla.ac.uk
- Library repository staff will check copyright issues
- In most cases your author final version will be required
- Versions in Word are converted to pdf

Concluding thoughts

- Deposit in Enlighten strongly encouraged by University (statement from VP Steve Beaumont)
- Research funders starting to require deposit, and view open access as a good thing
- Benefits for authors in depositing
- Need not be a time consuming process
